

Now Accepting Applications for the RYAM Scholarship

Applications for the Rayonier Advanced Materials' scholarship are now being accepted!

Last year, 16 candidates from local high schools were interviewed for the scholarship, with 6 scholarships being awarded. The \$10,000 scholarship, which is paid over four years, also includes a paid internship at either location for the student as a rising junior. After great success during the first two years of the new program, we look forward to interviewing another group of talented high school seniors.

Program Details and Requirements

Eligible applicants must a high school senior at a high school within a 45-mile radius of either the Jesup or Fernandina Beach facilities. In addition, the applicant must have plans to enroll in a relevant engineering program at one of the universities listed below in order to be considered for the new scholarship:

- Florida:** University of Florida, Florida A&M University, Florida State University, University of South Florida, University of North Florida, or the University of Central Florida
- Georgia:** Georgia Tech, Georgia Southern or University of Georgia
- North Carolina:** North Carolina State School of Pulp and Paper Science
- Alabama:** Auburn University

Applications can be submitted today through an online portal that will automatically screen for eligible applicants. Scholarship recipients will be selected from eligible applicants by an appointed committee that will review applications and perform joint interviews with candidates.

To apply, candidates can log on to <https://aim.applyists.net/RYAM/>. Applications will be accepted until midnight January 8, 2018.
